

FELLOWS CLINIC OBJECTIVES (Longitudinal Clinics)

Please note that these objectives supplement the RCPS objectives

General Objective: The resident will gain experience in the assessment, investigation and treatment of outpatient pulmonary pathology. In addition, the resident will develop an appreciation for the scope and responsibility of running their own outpatient practice.

- | | | |
|-----------------|----|--|
| Medical Expert | 1 | See the objectives for ambulatory care. |
| | 2 | The resident will demonstrate skill in interpretation and differential diagnosis of CXRs and CT scans |
| Communicator | 3 | The resident will develop an outpatient referral base by virtue of communication with referring physicians and by meeting the needs of these physicians. |
| | 4 | The resident will develop communication skills in dealing both verbally and in writing with referring physicians, outpatient services/resources and para-medical support services. |
| | 5 | Also see communication objectives of the ambulatory care rotation. |
| Collaborator | 6 | The resident will develop the skills required to work effectively with secretarial and clinic personnel. |
| | 7 | The resident will acquire the necessary skills to liaise with outpatient services such as home care, respiratory home care companies and palliative care for optimal care of their patients. |
| Manager | 8 | The resident will gain an appreciation for the complexity of the smooth running of an outpatient practice. |
| Professional | 9 | The resident will display both professional and personal behaviour appropriate to a consultant. |
| Health Advocate | 10 | The resident will serve as an advocate for their patient's health which includes promotion of regular immunization, and other appropriate preventative health strategies. |

BY THE END OF TWO YEARS, THE RESIDENT WILL BE RUNNING A FUNCTIONALLY INDEPENDENT OUTPATIENT CLINIC.
